

DHI molecule

5,6-dihydroxyindole

**EUMELANIN PRECURSOR**

Melanins and their pathways represent a unique source of bioavailable and biocompatible soft materials, metabolites and processes of considerable potential for health care and technological applications. Sold in batches multiple of 1g in plastic bottles. To be stored in refrigerator .

DISCLAIMER

Nanofaber © provides this product to early discovery researchers as part of a collection of unique chemicals. The nominal purity of this product is 99.8%(±0.5%) determined via NMR. Nanofaber performs and provides routinely NMR analytics on each 1g batch for this product. Yet, buyer assumes final responsibility to confirm product identity and purity. The product is sealed in nitrogen protective atmosphere. To be stored in refrigerator for longer shelf life. All sales are final.

Notwithstanding any contrary provision contained in Nanofaber's standard terms and conditions of sale or an agreement between Nanofaber and buyer, Nanofaber sells this product "as-is" and makes no representation or warranty whatsoever with respect to this product, including any (a) warranty of merchantability, (b) warranty of fitness for a particular purpose, or (c) warranty against infringement of intellectual property rights of a third party, whether arising by law, course of dealing, course of performance, usage of trade or otherwise.
